

Observation of Viruses (Corona etc.,) in our Body

Test 1 : Bathing using Hot Water (Up to the level of his/her tolerance)

Stage 1: To collect samples from the first tank

Stage 2 : Boil the water up to 100%

Stage 3 : Then cool the water up to his/her tolerate level, then collect the samples and test to be carried out again

Test 2 : Bathing using Normal/Cooled Water (Up to the level of his/her tolerance)

Stage 1: To collect samples from the first tank

Stage 2 : Boil the water up to 100%

Stage 3 : Then cool the water up to his/her tolerate level, then collect the samples and test to be carried out again

In both testing, to inject lemon / turmeric / tulsi / neem /other medicine etc., to the tank 3 (Ref. Stage3), if needed. After each test : He/She will be in rest up to the level (Minimum of 30 Mins).

 - Valve for open /close

- Apply the above test up to the maximum recovery from the viruses

Note : Concept is Mine... Implementation is yours So Take care of all... S.Shunmuga Sundaram :+91-7448862261
